International Organization for Standardization. Quantities and units — Part 5: Electricity and magnetism. (ISO 31-5). Ginebra: ISO; 1992 2).

International Organization for Standardization. Quantities and units — Part 6: Light and related electromagnetic radiations. (ISO 31-6). Ginebra: ISO; 1992 3).

International Organization for Standardization. Quantities and units — Part 8: Physical chemistry and molecular physics. (ISO 31-8). Ginebra: ISO; 1992 4).

International Organization for Standardization. Quantities and units — Part 9: Atomic and nuclear physics. (ISO 31-9). Ginebra: ISO; 1992 5).

International Organization for Standardization. Quantities and units — Part 10: Nuclear reactions and ionizing radiations. (ISO 31-10). Ginebra: ISO; 1992 6).

International Organization for Standardization. Quantities and units — Part 11: Mathematical signs and symbols for use in the physical sciences and technology. (ISO 31-11). Ginebra: ISO; 1992 7).

International Organization for Standardization. Quantities and units — Part 12: Characteristic numbers. (ISO 31-12). Ginebra: ISO; 1992 8).

International Organization for Standardization. Quantities and units — Part 13: Solid state physics. (ISO 31-13). Ginebra: ISO; 1992 9).

International Organization for Standardization. Terminology work — Principles and methods. (ISO 704:2000). Ginebra: ISO; 2000.

International Organization for Standardization. SI units and recommendations for the use of their multiples and of certain other units. (ISO 1000:1992/Amd.1:1998). Ginebra: ISO; 1998.

International Organization for Standardization. Terminology work — Vocabulary — Part 1: Theory and application. (ISO 1087-1:2000). Ginebra: ISO; 2000.

International Organization for Standardization. Statistics — Vocabulary and symbols — Part 1: General statistical terms and terms used in probability. (ISO 3534-1). Ginebra: ISO.

International Organization for Standardization. Geometrical Product Specifications (GPS) — Surface texture: Profile method; Measurement standards — Part 2: Software measurement standards. (ISO 5436-2). Ginebra: ISO.

International Organization for Standardization. Accuracy (trueness and precision) of measurement methods and results — Part 1: General principles and definitions. (ISO 5725-1:1994/Cor.1:1998). Ginebra: ISO; 1998.

International Organization for Standardization. Accuracy (trueness and precision) of measurement methods and results — Part 2: Basic method for the determination of repeatability and reproducibility of a standard measurement method. (ISO 5725-2:1994/Cor.1:2002). Ginebra: ISO; 2002.

International Organization for Standardization. Accuracy (trueness and precision) of measurement methods and results — Part 3: Intermediate measures of the precision of a standard measurement method. (ISO 5725-3:1994/Cor.1:2001). Ginebra: ISO; 2001.

International Organization for Standardization. Accuracy (trueness and precision) of measurement methods and results — Part 4: Basic methods for the determination of the trueness of a standard measurement method. (ISO 5725-4:1994). Ginebra: ISO; 1994.

International Organization for Standardization. Accuracy (trueness and precision) of measurement methods and results — Part 5: Alternative methods for the determination of the precision of a standard measurement method. (ISO 5725-5:1998/Cor.1:2005). Ginebra: ISO; 2005.

International Organization for Standardization. Accuracy (trueness and precision) of measurement methods and results — Part 6: Use in practice of accuracy values. (ISO 5725-6:1994/Cor.1:2001). Ginebra: ISO; 2001.

International Organization for Standardization. Quality management systems — Fundamentals and vocabulary. (ISO 9000:2005). Ginebra: ISO; 2005.

International Organization for Standardization. Measurement management systems — Requirements for measurement processes and measuring equipment. ISO 10012. Ginebra: ISO; 2003.

International Organization for Standardization. International terminology standards — Preparation and layout. (ISO 10241:1992). Ginebra: ISO; 1992.

International Organization for Standardization. Statistical methods for use in proficiency testing by interlaboratory comparisons. (ISO 13528). Ginebra: ISO; 2005.

International Organization for Standardization. Medical laboratories — Particular requirements for quality and competence. (ISO 15189:2007). Ginebra: ISO; 2007.

International Organization for Standardization. In vitro diagnostic medical devices — Measurement of quantities in biological samples — Metrological traceability of values assigned to calibrators and control materials. (ISO 17511). Ginebra: ISO; 2003.

International Organization for Standardization. Guidance for the use of repeatability, reproducibility and trueness estimates in measurement uncertainty estimation. (ISO/TS 21748). Ginebra: ISO; 2004.

International Organization for Standardization. Measurement uncertainty for metrological applications — Repeated measurements and nested experiments. (ISO/TS 21749). Ginebra: ISO; 2005.

International Organization for Standardization. Quantities and units — Part 3: Space and time. (ISO 80000-3:2006). Ginebra: ISO; 2006.

International Organization for Standardization. Quantities and units — Part 4: Mechanics. (ISO 80000-4:2006). Ginebra: ISO; 2006.

International Organization for Standardization. Quantities and units — Part 5: Thermodynamics. (ISO 80000-5:2007). Ginebra: ISO; 2007.

International Organization for Standardization. Quantities and units — Part 8: Acoustics. (ISO 80000-8:2007). Ginebra: ISO; 2007.

International Organization for Standardization. Reference materials — Contents of certificates and labels. (ISO Guide 31:2000). Ginebra: ISO; 2000.

International Organization for Standardization. General requirements for the competence of reference material producers. (ISO Guide 34:2000). Ginebra: ISO; 2000.

International Organization for Standardization. Reference materials — General and statistical principles for certification. (ISO Guide 35:2006). Ginebra: ISO; 2006.

International Organization for Standardization. International Electrotechnical Commission. Uncertainty of measurement — Part 3: Guide to the expression of uncertainty in measurement (GUM:1995). (ISO/IEC Guide 98-3:2008). Ginebra: ISO; 2008.

International Organization for Standardization. International Electrotechnical Commission. Uncertainty of measurement — Part 3: Guide to the expression of uncertainty in measurement (GUM:1995) — Supplement 1: Propagation of distribution using the Monte Carlo method. (ISO/IEC Guide 98-3:2008/Suppl.1). Ginebra: ISO; 2008.
